

Purpose: Audio-Digest Foundation CME/CE activities are designed to provide its learners “physicians and other healthcare professionals” with continuing education that will help identify clinical problems in their practice settings, provide content to help to solve those problems, and increase their application of knowledge to practice. Audio-Digest Gastroenterology is specifically designed to provide the participant with state-of-the-art information, including, but not limited to, procedures and techniques and/or the diagnosis and management of: Inflammatory Bowel Disease Irritable Bowel Syndrome Gastroesophageal reflux disease Ulcer disease Liver disease Pancreatic disease Cancer within the digestive system Endoscopy Esophageal disease Colon problems Transplantation Nutrition The goal of this program is to improve the management of hepatitis C virus (HCV) infection and inflammatory bowel disease (IBD). After hearing and assimilating this program, the clinician will be better able to: 1: Recognize the impact of genetics on the management of HCV infection and IBD. 2: Evaluate and discuss the studies looking at new drugs for HCV, specifically telaprevir and boceprevir. 3: Describe studies that show the possibility of utilizing interferon (IFN)-free therapy in the future. 4: Discuss the main problem associated with the use of albumin-IFN a2b. 5: Elaborate on the important genes associated with IBD and how they can be used to identify risk, determine spectrum of disease, guide development of new therapies, and predict response to therapy.
