

The best cities become an ingrained part of their residents identities. Urban design is the key to this process, but all too often, citizens abandon it to professionals, unable to see a way to express what they love and value in their own neighborhoods. New in paperback, this visually rich book by Alexandros Washburn, former Chief Urban Designer of the New York Department of City Planning, redefines urban design. His book empowers urbanites and lays the foundations for a new approach to design that will help cities to prosper in an uncertain future. He asks his readers to consider how cities shape communities, for it is the strength of our communities, he argues, that will determine how we respond to crises like Hurricane Sandy, whose floodwaters he watched from his home in Red Hook, Brooklyn. Washburn draws heavily on his experience within the New York City planning system while highlighting forward-thinking developments in cities around the world. He grounds his book in the realities of political and financial challenges that hasten or hinder even the most beautiful designs. By discussing projects like the High Line and the Harlem Childrens Zone as well as examples from Seoul to Singapore, he explores the nuances of the urban design process while emphasizing the importance of individuals with the drive to make a difference in their city. Throughout the book, Washburn shows how a well-designed city can be the most efficient, equitable, safe, and enriching place on earth. The Nature of Urban Design provides a framework for participating in the process of change and will inspire and inform anyone who cares about cities.

Meridian, Mississippi, the most important town in the state. One of the greatest railroad centers in the Southwest. Its advantages for all kinds of manufacturing, Prayers That Avail Much Vol. 3, Jo Jo Sticker Book to Color with Sticker, Assyrian and Babylonian letters belonging to the Kouyunjik collections of the British museum Volume 9, The solicitors guide and tradesmans instructor, concerning bankrupts To which is annexed the various forms of proceedings, By the author of The solicitors practice, Morris Philip: Mechanic, Mental Mathematician, Knitting Machine Inventor, An Autobiography of a 5th Grade Dropout, Coragem para evoluir (Portuguese Edition), Remaking American Power: Potential Energy Market Impacts of EPAs Proposed GHG Emission Performance Standards for Existing Electric Power Plants (CSIS Reports), Linear Pro-p-Groups of Finite Width (Lecture Notes in Mathematics),
